Legionella: Responsible Persons Training Course

The Company

Evolution aims to provide the highest quality total water treatment, water hygiene and consultancy service packages to the building services maintenance, education, facilities management and healthcare sectors, in addition to end user clients.

Evolution's "in house" Consultancy team has provided informal training courses to existing clients for many years. In response to requests for an accredited and specialised course that focuses upon the management responsibilities relevant to Responsible Persons and senior managers, Evolution has developed a specific course that carries City & Guilds accreditation.

The course provides critical advice with regards to key responsibilities in line with current regulations and guidance, together with management and record keeping requirements necessary to ensure that all parties involved in, and exposed to the effects of any legionella management and control programme are suitably "protected".

Leaders in Water Treatment & Water Hygiene

Training forms just one part of the market leading services offered by Evolution Water Services Ltd.

Legionella: Responsible Persons Training Course

Course Objective

To provide delegates with key information in order to ensure that water systems for which they are responsible are being managed and maintained effectively and in accordance with relevant statutes and guidance.

Who should attend

The course is aimed at Responsible Persons, senior managers and other personnel whose responsibility is to ensure that engineered water systems are adequately managed and maintained. The course focuses on the key areas of management responsibility, including record keeping.

The Trainers

The training is delivered by Evolution's experienced "in-house" trainers, each of whom has substantial, in-depth, practical knowledge of all types of buildings' water systems and their efficient and safe management.

Course Overview

- A brief history and medical aspects of the disease
- Legislation and the requirements of HSC ACoP & Guidance L8
- Competency
- Responsibilities of all parties involved
- Risk Assessment; what is a suitable and sufficient risk assessment? Where and when a risk assessment is required and when it should be reviewed
- Legal implications: case studies
- Interpreting maintenance records and test results
- Record keeping and the management of site records

All delegates will receive a training pack immediately prior to course commencement, which will include a copy of the course material.

The course concludes with a short verification test.

Certification

A City & Guilds accredited certificate will be awarded to all delegates following successful completion of the course verification test.

Course Feedback

97%

...thought the course content was either "good" or "very good".

99%

...thought the course was "very useful".

97%

...would recommend the course to others.
